QA EXPERTISE

- Functional and regression testing
- Smoke, exploratory and UAT
- Test plans and test cases
- Risk-based prioritisation
- Defect reporting and triage
- Agile / Scrum

TOOLS

Automation

Playwright | TypeScript | Page Object Model

API

Postman | Newman | REST | JSON Schema

CI and tools

GitHub Actions | Git | Jira | Confluence | DevTools | axe

EDUCATION

MBA, Project Management
University of Engineering and Technology (UET), Lahore
2015 – 2018

BE Electrical Engineering
Pakistan Institute of Engineering and Applied Sciences (PIEAS), Islamabad
2009 – 2013

LANGUAGES

English: good

LOOKING FOR

QA Engineer roles. Available for remote roles across Germany, and for hybrid or on-site roles in Munich.

AFZAL AHMED

QA Engineer | Manual, API and UI Test Automation

QA engineer with more than ten years in IT delivery and quality assurance, most recently testing web, SaaS and AI-enabled products. Turns requirements into focused test scenarios, writes defect reports developers can act on straight away, and works closely with product and engineering teams through triage and release. Also builds API and UI test automation with Postman/Newman and Playwright (TypeScript), running in CI on GitHub Actions. Holds a BE in Electrical Engineering and an MBA in Project Management.

PORTFOLIO PROJECTS

All public on GitHub, with tests running in CI and live HTML reports.

Playwright + TypeScript E2E framework
github.com/afzal-ahmed-qa/playwright-typescript-e2e-framework

- 68 UI, API and end-to-end tests for demoqa.com using the Page Object Model, API-based test setup and generated test data.
- Runs in GitHub Actions with a published HTML report (video and screenshot per test); found and documented four site defects.

Petstore API tests with Postman and Newman
github.com/afzal-ahmed-qa/petstore-api-tests-postman

- Collection covering all 20 endpoints: create/read/update/delete flows, negative cases, schema checks and a data-driven run.
- Runs daily with Newman in CI. Found that login accepts any password and that user passwords are returned in plain text.

Manual test plans for an e-commerce shop and its API
github.com/afzal-ahmed-qa/manual-test-plans-ecommerce

- Test strategy, UI and API test plans, 88 test cases, traceability matrix and execution report for a live practice shop.
- Executed 87 cases and raised 10 defects, for example a negative quantity that produces a negative cart total.

PROFESSIONAL EXPERIENCE

QA Engineer · JunctionNet AI — 2026 – present

- Manual functional, regression, smoke and exploratory testing of web and AI-enabled features.
- Derive test scenarios from requirements and acceptance criteria and validate end-to-end business workflows.
- Log, prioritise and retest defects with clear evidence and reproducible steps.
- API checks in Postman; support release-readiness decisions with product and engineering.

QA / Product Quality Specialist · Qualio — Sep 2024 – Dec 2025

- Functional, regression and exploratory testing of key workflows against business requirements.
- Reproduced defects, verified fixes and supported release checks and UAT.

Quality Assurance and Release Support · Oxolo (AI platform) — Jul 2023 – Aug 2024

- Tested core user journeys and AI-assisted workflows with structured manual and exploratory testing.
- Validated generated output and integrations; supported frequent releases with smoke and regression checks.

IT Delivery and Quality · Earlier roles — 10+ years

- IT project delivery, solution coordination, requirements clarification and QA, working between business and technical teams to resolve issues and support reliable releases.
